

THE REACH-RWSN 100M INITIATIVE GLOBAL DIAGNOSTIC REPORT LAUNCH

© Stellalevi

Join us on 27 October 13:30 CEST for the launch of the REACH-RWSN 100M Initiative's Global Diagnostic Report

Last June, the 100M initiative launched a survey of water service providers working in rural areas globally to estimate the scale and potential of results-based funding for rural water services.

The Global Diagnostic Report will share findings from the survey as well as key implications and recommendations for organisations involved in rural water supply service provision, funding and regulation.
